

P9-10 Desain Tata Ruang Perpustakaan menggunakan Aplikasi Sweet Home 3D

Sekilas Sweet Home 3D

- Sweet Home 3D adalah sebuah freeware yang dikembangkan SourceForge.net di bawah lisensi GNU General Public Lisense.
- Aplikasi ini dapat digunakan untuk mendesain rumah, mulai dari tahap pembangunan sampai peletakan perabot rumah tangga.
- Anda dapat mendesainnya dengan format 2D dan melihat hasilnya dalam bentuk 3D.

Fitur Sweet Home 3D

- **Blueprint**. Menciptakan blueprint mulai dari ruang tamu, dapur, kamar tidur, ruang keluarga, kamar mandi, sampai dengan halaman belakang dapat dilakukan dengan mudah melalui aplikasi ini.
- **Funiture Model.** Lebih dari 75 jenis furnitur tersedia di aplikasi ini, mulai dari meja, bangku, kursi, tempat tidur, TV, komputer, hingga perlengkapan mandi.
- **Customisasi**. dapat merotasi posisi furnitur dengan mudah, menambahkan teks sebagai keterangan lebar dan panjang, bahan-bahan yang digunakan, dan lain sebagainya.
- **Photo dan Video**. Dapat mengatur cahaya lampu di dalam rumah, pantulan cahaya di cermin, dan bahkan sinar matahari yang masuk ke dalam rumah.
- **Plugin**. dapat mengunduh berbagai plugin yang disediakan atau mengembangkannya sendiri dengan turunan berdasarkan Model View Controller Architecture.
- **Impor dan Ekspor.** Impor dari aplikasi lain, dan dapat ekspor file pdf, video, dan image.

Tahapan Desain

The suggested steps of a home design in Sweet Home 3D are:

1. Import the scanned blueprint of your home as a background image of the home plan,
2. Draw walls upon this background image,
3. Edit walls thickness, colors and textures,
4. Add doors and windows to your home plan and adjust their size, to obtain a realistic view of your empty home,
5. Add furniture to your home plan, adjust their size and location, eventually using imported 3D models,
6. Draw rooms and change the color or the texture of their floor and their ceiling,
7. If your home has more than one story, add levels and staircases joining them, and restart the first six steps for each level,
8. Draw dimensions and add texts in your home plan to document it before printing it.
